

SINOPEC CORP. FACT SHEET

Company Profile

China Petroleum & Chemical Corporation ("Sinopec Corp.") is a large scale integrated energy and chemical company with upstream, midstream and downstream operations. Its principal business includes: exploring, developing, producing and trading of crude oil and natural gas; producing, storing, transporting and distributing and marketing of petroleum products, petrochemical products, synthetic fiber, fertilizer and other chemical products. Sinopec Corp. is China's largest manufacturer and supplier of petroleum products and major petrochemical products. It is the second largest oil and gas producer in China. Its refining capacity and ethylene capacity are ranked 2nd and 4th globally. The Company has the largest sales and distribution network of oil products and

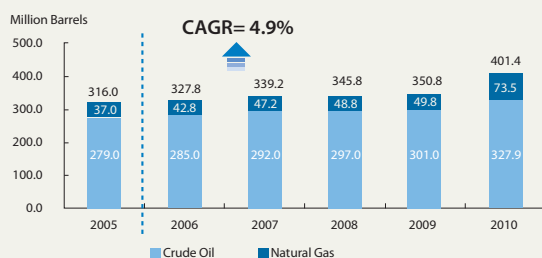

chemical products in China, it has the 2nd highest number of service stations in the world.

Sinopec holds true to its mission of "Enterprise development, Contribution to the Country, Shareholder value creation, Social responsibility and Employee wellbeing". It operates to the highest standard of integrity and work ethics, builds mutual success with partners through collaboration. Through dedication and passion to build Sinopec as a national flagship, together with thorough professionalism and a deliverable-driven spirit, we will strive to realize the group's vision of becoming a "globally competitive energy corporation".

Business Breakdown

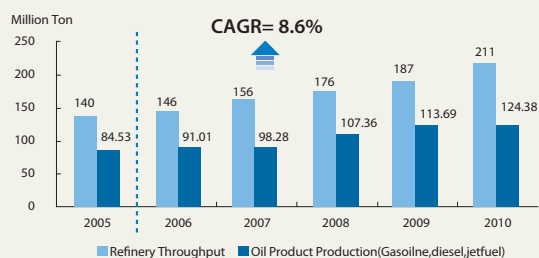

Exploration & Production

Sinopec Corp. is the second largest producer of crude oil and natural gas in China. As of the end of 2010, its proved reserves of crude oil and natural gas were 2,888 million barrels and 6,447 billion cubic feet respectively, its proved reserve of crude oil and natural gas was 3,963 million boe.

Refining

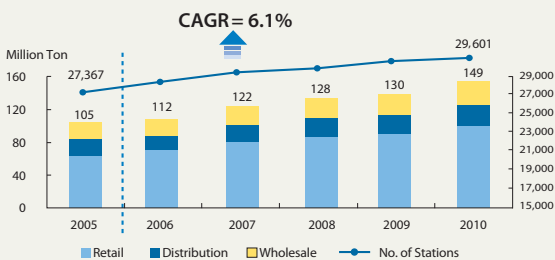

Sinopec Corp. is the largest oil refiner in China and the second largest globally. We produce gasoline, diesel, kerosene including jet fuel, lubricant, fuel oil, chemical feedstock and other petroleum products.

Note: Refinery throughput for 2008 through 2010 includes condensate and heavy crude oil.

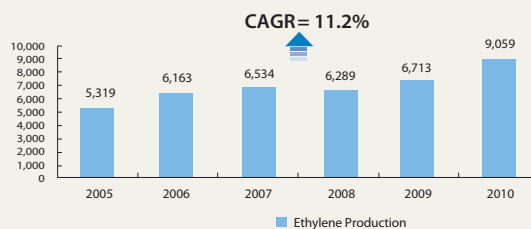

Marketing & Distribution

Sinopec Corp. has 30,116 branded gas stations, of which we own and operate 29,601. Our sales network of refined products ranks second globally and it is the largest in China.

Petrochemicals

As the largest petrochemicals producer and distributor in China, Sinopec Corp. produces a wide spectrum of chemical products including ethylene, synthetic resins, synthetic fiber monomers and polymers, synthetic fibers and synthetic rubbers. The company's ethylene production capacity reached 9.33 million tonnes in 2010, placing us forth globally.

Note: includes 100% of production from joint ventures

Sinopec Corp. Guiding Principles of 12th Five-Year Plan

To strengthen stronger business fundamentals as well as to grow in size. To continue leveraging on our strengths while minimizing and addressing our weaknesses when implementing the integration and globalization strategy linking resources with end market.

To move forward by improving our strategic structure adjustment including oil and gas reserves, refineries, petrochemical feedstock and products. To place great emphasis on the strategic development of new energy and alternative material;

To strengthen our marketing and sales networks for oil and chemical products, and development of the natural gas business to create further value;

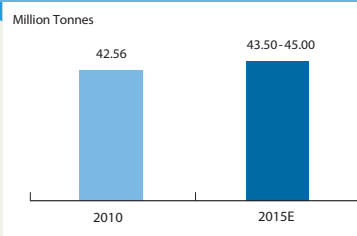

To continue to focus on resource optimization, energy conservation and emissions reduction, and on improving our energy utilization to preserve the environment;

To increase its efforts to build a stronger position in international trade and overseas development;

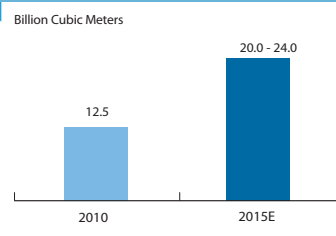

To take concrete steps toward technological and management innovation, and the attraction and retention of talent, paving the way for sustainable development of the Company in the future.
